

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

ALPHABETICAL LISTS

OF THE NAMES OF PERSONS

DECEASED, BORN, AND MARRIED,

IN THE

CITY OF PROVIDENCE.

NUMBER TWO.

1867.

PREPARED BY EDWIN M. SNOW, M. D.

CITY REGISTRAR.

PROVIDENCE:

HAMMOND, ANGELL & CO., PRINTERS TO THE CITY.

1868.

## INTRODUCTION.

---

This pamphlet contains the names of all the persons who were born, or married, or who died in the city of Providence, during the year 1867, and other information relating to them.

In preparing the second number of this series of documents, I have made a considerable number of changes with the view of increasing their value. The type is larger and plainer than that used in the number for 1866, and the amount of information given is considerably greater.

In relation to *Decedents*, the name, age, birth-place, and parentage of each person are given, together with the date of death, and the page of the records upon which each death is recorded. The names are arranged alphabetically, and also in the order of the dates of death.

In relation to *Children born*, the name of each child is given with the date of birth, the name and birth-place of the father, the name of the mother, and the page upon which the birth is recorded. The names of the children are arranged in strict alphabetical order, making a correct and complete index of the records.

In relation to *Persons married*, the pamphlet shows the name, the birth-place, and the names of the parents of each person married in Providence, in 1867, together with the date of each marriage, and the page of the records upon which it is recorded. The names of the grooms are arranged in a strictly alphabetical manner.

It will be seen that, in relation to all the persons whose names appear upon our records for the year 1867, sufficient information is given in this pamphlet, to identify each individual in his or her family relations, while precise reference is given to the page of the records where more full information may be obtained. Even in relation to births, where the names of the children are in too many cases wanting, the name and birth-place of the father, and the name of the mother will generally be sufficient to identify the child. The publication of these facts has already had the effect to make many persons desirous that the names of their children should be reported correctly, and there can be no doubt that it will have a positive and marked effect to increase the correctness of the records.

This pamphlet contains the names and other information relating to 4,295 persons recorded in 1867, and divided as follows: Decedents, 960; children born, 1,625; persons married, 1,710. In 1866, the whole number was 4,292.
